Server Station Market: Segmentation
The server station market are used in various way from storing data to providing access to employee. The server station market is bifurcated into six major segment which are classifies as, end user size, by type of operating system, server class, server type, sales channels and end user.

Based on end user size, server station market segmented into:
• Micro enterprises
• Small Enterprises
• Medium Enterprises
• Large Enterprises

Base on by operating system type, server station market segmented into:
- Linux operating system
- UNIX operating system
- Windows
- Other Operating Systems (i5/OS,z/OS)

Based on server class type, server station market segmented into:
- High end server
- Mid-range server
- Volume server

Based on server type, server station market segmented into:
- Blade server
- Multi node server
- Tower server
- Rack optimized server

Based on sale channel, server station market segmented into:
- Resellers sale
- Direct sale
