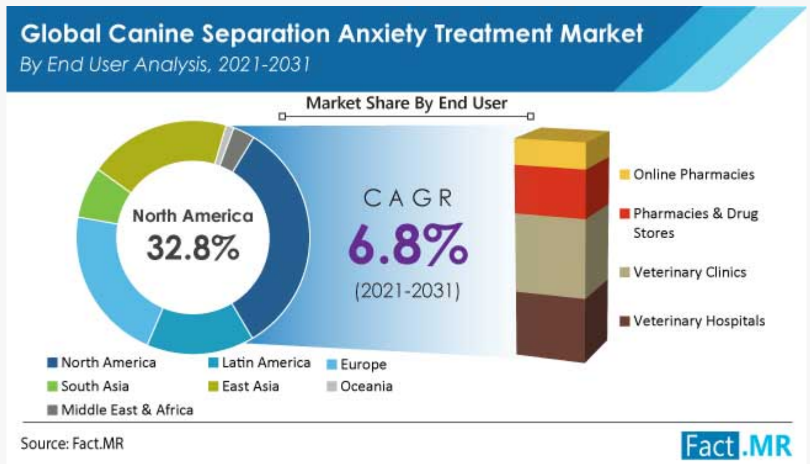
The U.S. Is One of the key Providers of Canine Separation Anxiety Treatment In the World: Report Fact.MR

Players in the canine separation anxiety therapy market should see attractive prospects as demand for lower-cost solutions grows, Fact.MR



Canine Separation Anxiety Treatment Market

ROCKVILLE, MARYLAND, UNITED STATES, October 29, 2021 /EINPresswire.com/ -- A latest publication by Fact.MR on the global canine separation anxiety market evaluates the opportunities and current market landscape, and provides detailed analysis and updates about corresponding sections affecting the market. The study offers detailed insights on key market dynamics, which include the drivers, restraints, trends, and opportunities in the canine separation anxiety treatment market. The principal aim of the market study is to present exclusive information about how the market will perform during the forecast period of 2021-2031.

As per Fact.MR – market research and competitive intelligence provider, the Sales of canine anxiety separation treatment was valued at US$ 21.4 Mn in 2020 and is expected to exhibit a CAGR of around 6% during the forecast period (2021-2031).

Canines, like human beings, experience anxiety issues. Dog anxiety can affect all breeds; however, it might differ from one dog to another. Separation anxiety is commonly observed in dogs who are overly attached to their owners, and it is estimated to affect around 14% of dogs, globally.

Canines suffering from anxiety often exhibit undesirable behavior such as improper urinating and defecation, excessive salivation, and destroying furnishing and exit points such as windows and doors. If ignored or left untreated, it can have a long-term impact on the dog's mental health. Factors such as these will create demand for better treatment options for separation anxiety disorders in dogs. Also, the growing adoption of canines and increasing spend on animal health are anticipated to have a positive impact on market growth.

Strategy by Market Players

Collaborations and acquisitions were identified as the preferred key growth strategies adopted by leading players in this market. By pursuing these strategies, it helps them expand their geographic footprint and strengthen their existing product portfolio.

An example is the recent acquisition of Bayer Animal Division by Elanco Animal Health, Inc., in August 2020. This acquisition enabled Elanco to expand its current product offerings and strengthen its foothold in the global animal health industry. Also, Elanco's long-standing focus on veterinarians is combined with Bayer Animal Health's direct-to-consumer expertise to create new opportunities for growth.
