Assisted reproductive technology (ART) is defined as the technology used for the treatment of infertility. It provides fertility treatment that handles both a man's sperm and a woman's egg. It aims to offer efficient and affordable care in order to optimize the chance of having singleton pregnancies. With the development in technology, ART has focused on biochemical and genetic research for the

delivery of healthy babies. It eradicates the burden of infertility on families and individuals. It offers real opportunities to improve medical outcomes and enhance efficiency.

Covid-19 Scenario:

- 1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.
- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.
- 3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.
