The Covid-19 (corona virus) pandemic is impacting society and the overall economy across the world. The impact of this pandemic is growing day by day as well as affecting the supply chain. The COVID-19 crisis is creating uncertainty in the stock market, massive slowing of supply chain, falling business confidence, and increasing panic among the customer segments. The overall effect of the pandemic is impacting the production process of several industries, and many more. Trade barriers are further restraining the demand- supply outlook. As government of different regions have already announced total lockdown and temporarily shutdown of industries, the overall production process being adversely affected; thus, hinder the overall Induced Pluripotent Stem Cells globally. This report on 'Induced Pluripotent Stem Cells' provides

the analysis on impact on Covid-19 on various business segments and country markets. The report also showcase market trends and forecast, factoring the impact of Covid -19 Situation.

#### COVID-19 Scenario:

- Due to the global pandemic all over the world, the Induced Pluripotent Stem Cells manufacturers are majorly focusing on essential Induced Pluripotent Stem Cells production including ventilators and diagnostics.
- However, due to the precautionary measures taken by governments in various regions, the supply chain has been hampered. Which may result in shortage of devices in certain locations.
- Food and Drugs Administration (FDA), on the other hand, shared a COVID-19 guidance with medical device manufacturers to notify the agency about changes that could affect availability of their products.

#### Induced Pluripotent Stem Cells Market Segmentation:

The research offers a detailed segmentation of the global Induced Pluripotent Stem Cells market. Key segments analyzed in the research based on derived cell type, application, end-user and geography. Based on derived cell type, the market is segmented into hepatocytes, fibroblasts, keratinocytes, amniotic cells and others. Based on application, the market is segmented into academic research, drug development and toxicity testing and regenerative medicine, End Users and geography. Extensive analysis of sales, revenue, growth rate, and market share of each for the historic period and the forecast period is offered with the help of tables.

#### Induced Pluripotent Stem Cells Market Regional Analysis:

The market is analyzed based on regions and competitive landscape in each region is mentioned. Regions discussed in the study include North America (United States, Canada and Mexico), Europe (Germany, France, UK, Russia and Italy), Asia-Pacific (China, Japan, Korea, India and Southeast Asia), South America (Brazil, Argentina, and Colombia), Middle East and Africa (Saudi Arabia, UAE, Egypt, Nigeria and South Africa). These insights help to devise strategies and create new opportunities to achieve exceptional results.
