The naked eye views objects in a three dimensional form. In a bid to capitalize on this and increase sales, major industries across the globe introduced movies & games in a 3D form. 3D technology has redefined entertainment by offering customers a truly engrossing and high definition experience. Film producers create this effect by shooting with two cameras, each replicating the view of one eye.

In 2002, Sharp Corporation launched Sharp Mova SH251iS- the world's first commercial 3D enabled mobile phone. These phones were a huge success in the Japanese market. The aim of this report is to provide an insight into the global mobile 3D market, with current and projected trends, and to carry out an in-depth analysis of the market's potential. This report analyzes opportunities in developed and emerging economies so that companies can make strategic

decisions and gain competitive edge.
