2030" The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Lumpectomy

Lumpectomy is also known as wide local excision or breast-conserving surgery. Unlike mastectomy, only a portion of the breast is removed in this procedure. Doctors may also refer to lumpectomy as an excisional biopsy. Lumpectomy helps in confirming diagnosis and complete absence of cancer. It is also the premiere treatment option for some women with early-stage breast cancer.
