

Bathroom & Toilet Assist Devices Market Size Worth USD 6.61 Billion by 2026 – Reports and Data

Rising elderly population demographics, Growing rate of awareness about assistive devices, Technological advancement are driving growth of market

NEW YORK, NY, UNITED STATES,
November 3, 2021 /EINPresswire.com/
-- The global [bathroom & toilet assist devices market](#) was valued at USD 4.0

Billion in 2018 and is expected to reach USD 6.61 Billion by the year 2026, at a CAGR of 6.5 percent. According to United Nations Department of Economic and Social Affairs, the global percentage share of the aging population (aged 60 years or above) has increased from 9.2% in 1990 to 11.7% in 2013 and is projected to reach 21.1% by 2050. Aging increases the vulnerability of a person towards developing diseases such as osteoporosis, rheumatoid arthritis. Therefore, the increasing geriatric population base is expected to broaden the market for manufacturers of assist devices.

The disabilities of a person to carry out the basic activities of daily life (ADL) are defined through the need for assistance in performing the routine self-care tasks such as dressing, bathing or using the toilet. In homes, the problems to conduct such daily activities by elderly occur especially in the bathroom and specifically in bathing. A relevant study showed that the first ADL with which the elderly faced difficulty was bathing, and toileting was the third in order. Disability for bathing increases the total hours consumed in unpaid and paid personal assistance in homes and also the risk of long term dependency on nursing home admission among the older people. Bathroom and toilet assist devices such as bath lifts, chairs, hand grips, anti-slip mats and essentially other bathing aids help curb the difficulties in addressing the ADL for this particular demographic segment in our society.

The commode segment in bathroom and toilet assist devices accounted for the largest share of 18.7% among the various product types in the global market, owing to its ease of use. Also, due to the increasing aging population, an increase in demand for shower chairs and stools, and toilet seat raisers are anticipated to grow at CAGR of 7.1% in the global market. Restraint would

Reports And Data

be the high cost of bathroom and toilet assist devices in the global market. The high growth potential of developing economies, and mergers and acquisition in the above market, will open further opportunities in the global market during the coming years.

For the purpose of this report, Reports and Data has segmented the bathroom & toilet assist devices market on the basis of product type, end-use, and region:

Type (Revenue in USD Million; Volume in Units, 2016–2026)

- Shower Chairs and Stools

- o Shower Chairs

- o Shower Stools

- o Others

- Bath Lifts

- o Fixed Bath Lifts

- o Reclining Bath Lifts

- o Lying Bath Lifts

- o Others

- Toilet Seat Raisers

- Commodes
 - oShower and Toilet Commodes
 - oToilet Commodes
- Handgrips and Grab Bars
- Bath Aids

End-Use (Revenue in USD Million; Volume in Units, 2016–2026)

- Residential
- Commercial

The research study includes an in-depth analysis of the market using advanced research methodologies such as SWOT analysis and Porter's Five Forces analysis. The report further explores the key business players along with their in-depth profiling, product portfolio, and strategic business decisions. The report has been formulated through extensive primary and secondary research and further validated by analysts, industry experts, and market professionals. The report also sheds light on the recent mergers and acquisitions, joint ventures, collaborations, partnerships, and product launches, among others.

Regional analysis covers assessment of import/export, production and consumption ratio, supply and demand, cost, price, estimated revenue and gross margins, and presence of key players in the region. The report also offers insights about revenue growth, market size, market share, technological advancements, and presence of key players in each region.
