The global medical fluid bags market generated \$3.5 billion in 2020, and is projected to reach \$6.05 billion by 2030, witnessing a CAGR of 5.5% from 2021 to 2030.

Increase in incidence of chronic diseases, rise in geriatric population, and surge in number of premature births drive the growth of the global medical fluid bags market. However, health concerns associated with the use of BPA and DEHP medical bags restrain the market to some extent. On the other hand, increase in number of hospitals and growing pharmaceutical sector presents new opportunities in the upcoming years.

Impact of COVID-19 on Medical Fluid Bags Market-

The outbreak of the COVID-19 pandemic had a large economic impact, inflicting significant loss across many countries, which in turn, resulted in financial adversities in the healthcare sector.

Furthermore, factors such as supply chain disruptions and raw material shipment delays, have affected the antipsychotic drugs industry growth.

On the other hand, rise in the demand for intravenous bags used in IV therapy supplemented

the market growth even more.
