

Global Organic Farming Market Size And Organic Farming Market Growth Opportunities

*The Business Research Company's
Organic Farming Global Market Report
2021: COVID-19 Growth And Change*

LONDON, GREATER LONDON, UK,
November 3, 2021 /EINPresswire.com/

-- According to the new market research report 'Organic Farming Global Market Report 2021: COVID-19 Growth And Change' published by The

Business Research Company, the [organic farming market](#) is expected grow from \$95.38 billion in 2020 to \$103.36 billion in 2021 at a compound annual growth rate (CAGR) of 8.4%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$151.36 billion in 2025 at a CAGR of 10%. Environmental gain from organic farming is expected to drive the organic farming market.

The organic farming market is associated with the sales of produces by farms that produce them in organic ways. The organic farming is an alternative form of farming for crops and livestock's produce which doesn't use pesticides, artificial fertilizers, genetically modified organisms and antibiotics to increase the production. This has many benefits to the environment and the individuals using these yields.

Trends In The Global Organic Farming Market

The launch of various schemes by the governments of various countries across the world is promoting organic farming. Due to health benefits and environmental benefits offered by organic products, the governments are promoting organic farming activities by launching various schemes and encouraging the population to shift towards organic products. For instance, the government of India is promoting organic farming under its two dedicated schemes -
