

LANCE CAMPER AND NO DIRTY WATER PARTNER TO BRING INNOVATIVE PRODUCT TO GROWING MARKET OF OFF-GRID CAMPERS

The Enduro teardrop is designed to maximize time outdoors- giving back time spent outside, doing more of what they love.

LAS VEGAS, NEVADA, UNITED STATES, November 3, 2021 /EINPresswire.com/ -- TRENDS IN OUTDOOR ADVENTURE: LANCE CAMPER AND NO DIRTY WATER PARTNER TO BRING INNOVATIVE PRODUCT TO GROWING MARKET OF OFF-GRID CAMPERS

Specialty Equipment Manufacturers Association (SEMA) SHOW, Las Vegas, NV, November 2-5

The trend toward outdoor adventure and overlanding activities has accelerated in the last few years. A new influx of campers and more experienced RVers are going off-grid, an endeavor that requires a different set of skills and equipment.

One barrier to this style of outdoor adventure has historically been the availability of reliable drinking water. Campers and overlanders spend considerable time and effort hauling water to their adventures. With its new Enduro teardrop adventure prototype towable, Lance directly addressed this growing market and trend by listening to campers and building in the most requested features.

Lance Camper's new Enduro teardrop adventure prototype towable addresses this issue with an innovative on board portable advanced water purification system. The Enduro features a bathroom and shower combination and an ultra-compact, high performing off-grid No Dirty Water (NDW) MRX water purification system. Other Enduro features include:

000% Composite Construction

Interior Shower and Cassette Toilet

DSleeps Up To Six Via King Size Bed, Two Bunk Beds & Available Roofnest Flacon XL Rooftop Tent

D00% Self Sustaining Off Grid Capability: Two 190 Watt Solar Panels, Two 100AH Lithium Batteries, 1500W Inverter, 40 Gallon Fresh Water Tank, 26 Gallon Grey Water Tank
 D Dirty Water MRX Mobile Water Purification System
 D 2V Zero Breeze Mark 2 Air Conditioner

Dustom Designed Interior Featuring: Ultraleather Fabric, Infinity Flooring, Bamboo Table,
 Expad Mattress & Rumpl Comforter
 DBass Through Interior Storage Bay
 DRotopaX Exterior Water & Fuel Storage

Instead of a traditional production line process, Lance is considering a flexible, consumer-centric production hubs that ensure disciplined focus by technicians who care about integrating efficiency and building consumer confidence in their products.

Lance Camper VP of Marketing, Bob Rogers, a lifetime outdoor adventure RVer has been drawn to adventure camping since childhood. He saw the trend toward off-grid camping and the lack of confidence that many have in their ability to have clean water for the duration of their adventures.

"With the Enduro, we've built a product with advanced features that helps maximize your time outdoors," said Bob. "It's a camper you can have confidence in, whether you park it close to town or completely off the grid. A lot of thought went into building a consumer-centric product that allows people to go where they want with confidence."

The NDW MRX water purification system from Blu Technology is at the heart of the Enduro's offgrid capabilities. The MRX is a on board portable, self-contained off-grid water purification system that delivers gallons of healthy, great tasting water in just minutes.

The NDW MRX unit features include:

1,000+ gallons per day capacity
Runs on clean, green 12 volt battery power
Compact and mobile at 11 pounds
High-quality, high-performance internal pump with a 3 GPM flow rate
Dual high-performance filters, Blu Tech 0.2 micron filter to address taste, odor, color, bacterias, viruses, and other contaminants
Redefines affordability
Environmentally green, eliminates the need to bring plastic water bottles on trips

"Since the Enduro is an off-grid focused unit, consistent and reliable water is key to have anytime, anywhere. Water that one can trust for the whole family is so important" said Pierce Fitzpatrick, Co-Founder, Blu Technology. "Our technology puts time back in the hands of campers, so they can spend time watching sunsets instead of pumping water and lugging plastic water bottles."

About Lance Camper Manufacturing Corp.: Founded in 1965, with headquarters in Lancaster, CA, Lance Camper. is the premier manufacturer of high-quality ultra-lightweight composite-built truck campers and travel trailers in North America. RVs, Lance's recent 17 th -year win of the

RVDA's prestigious and coveted DSI (Dealer Satisfaction Index) Quality Circle Award is a direct reflection of this quality in both their products and the service provided to Lance dealers and consumers for the past 55 years. Lance Camper Mfg. Corp. is a subsidiary of REV Group, Inc.

About REV Group, Inc.:

REV Group [®] companies are leading designers and manufacturers of specialty vehicles and related aftermarket parts and services. Our companies serve a diversified customer base, primarily in the United States, through three segments: Fire Emergency, Commercial, and Recreation. They provide customized vehicle solutions for applications, including essential needs for public services (ambulances, fire apparatus, school buses, and transit buses), commercial infrastructure (terminal trucks and industrial sweepers) and consumer leisure (recreational vehicles). REV's diverse portfolio is made up of well-established principal vehicle brands, including many of the most recognizable names within their industry. Several of our brands pioneered their specialty vehicle product categories and date back more than 50 years. REV Group trades on the NYSE under the symbol REVG. Investors-REVG

About Blu Technology: Blu Technology is a technology, consumer focused company that serves water, air, and surface sanitization markets where small, affordable, and high performance is key. Brands underneath Blu Technology are No Dirty Water, No Dirty Air, and No Dirty Space. Common attributes of each brand include:

Small, lightweight, portable
Little to no electric hookup required, 12 volt for solar compatibility
Visually unique, where design and performance come together
Easily modified for customization
Digitally connected
Low cost
High performance
World transforming ideation
Fast to market

No Dirty Water's RX is an evolution of the Rugged Water concept, awarded Fast Company's 2021 World Changing Idea Honorable Mention.

Blu Technology is a group that develops transformational ideas to the point of production with a focus on creating value and a better world.
