“Florida Auto Tint is an XPEL authorized installer, meaning that what we offer our customers meets the highest standards in the industry,” said William.

Florida Auto Tint offers a number of window tinting packages, including Color Stable Window Tint, which gives almost 100 percent UV protection and keeps the car interior and occupants protected. Ceramic Window Tint allows filtering of infrared radiation and blockage of the sun's heat. They also have an Infrared Rejection Window Tint which can create a solid barrier, blocking up to 98 percent of infrared heat.

To ensure quality, William says they only work with the most trusted brands in the industry. It is for this reason that they have chosen to carry XPEL's PRIME automotive window tint lineup. William adds that car window tinting is not just about keeping a low profile or making the car

look cool; it keeps the occupants comfortable and protected from harmful infrared rays.

"Our services are backed by a lifetime warranty," adds William assuring the customer that they are getting value for money.
