Ileostomy is the surgical procedure an opening is created using surgical devices in the ileum, which is the lowest part of the small intestine and then aligned such that it gets attached with the abdominal wall. The intestinal part is basically brought through to the abdominal wall for the formation of stoma. The customization can be done for

permanent or temporary basis and may help in removal of all or a particular part of the colon. The ileostomy is carried out to assist with the removal of the waste from the body. The surgery is carried out when the part of the rectum or colon is not working. The surgical procedures include total abdominal colectomy, total proctocolectomy, and small bowel resection.

Comprehensive competitive analysis and profiles of major market players, such as

Salts Healthcare, Smith and Nephew, 3M, B. Braun Melsungen AG, ConvaTec Inc., Coloplast A/S, Flexicare Medical Ltd., Pelican Healthcare, and Marlen Manufacturing

COVID-19 scenario analysis:

The global impact of the coronavirus is humongous as the complete lock down alert has been declared by the government organizations worldwide. The only preventive measures that can be carried out involves shut down of every region where gathering could be possible and hence, causing the downfall in the production and manufacturing of every product from every sector. However, the healthcare sector is affected in a positive way for the parameters that are required for the treatment of COVID-19 while other segments such as nutraceutical consumption, surgical procedures are immensely affected in a negative direction.

There is a rise in the digital platform as a way to help the doctors and patient connect and hence get access to the prescription online, which is anticipated to boost the market of OTC drugs. Pharmaceutical and biotechnology industries are hence observing a lucrative growth in the forecast period.
