Increasing demand for minimally invasive dental procedures, growing incidence of dental disorders, and rising trend of dental tourism in developing countries are expected to propel the growth of the global dental consumables market

High prevalence of dental diseases among geriatric population, surge in dental tourism across emerging economies, and increase in demand for minimally invasive dental procedures drive the growth of the global dental consumables market. Moreover, increase in awareness about oral hygiene supplements the market growth. However, high cost of dental products along with very limited reimbursement hampers the growth of the market. On the contrary, rise in demand for dental cosmetic procedures and increase in awareness about proper dentition are expected to

provide lucrative opportunities for the market players in the near future.

Asia-Pacific region to manifest fastest growth by 2023

Asia-Pacific region is estimated to register the fastest CAGR of 7.6% through 2023, owing to rise in awareness regarding dental disorders, surge in geriatric population, improved accessibility to medical services, and increase in product availability. However, Europe held the largest market share in 2017, contributing more than one-third of the total revenue, owing to increase in the number of dental restoration cases due to high incidence of dental disorders in the region. The other regions analyzed in the report include North America and Latin America, Middle East and Africa (LAMEA).
