hybrid operating room market size is expected to reach USD 2,366.9 Million at a steady CAGR of 12.4% in 2028, according to latest analysis by Emergen Research. Surge in number of surgical procedures and rising adoption of minimally invasive surgeries are driving market revenue growth to a significant extent.

Hybrid Operating Room (OR) is an advanced procedural space which combines traditional OR with an image guided interventional suite. The combination allows performance of highly complex and advanced surgical procedures. The rooms and teams are combined to meet the complex needs of patient surgery. These state-of-the-art spaces allow for the combination of image guided surgeries with open procedures.

Hybrid ORs allow smooth conversion from minimally invasive surgery space to an open procedure space by providing necessary capabilities and personnel in one space. Hybrid ORs

have also led to development of new procedures, which provide patients with complex diseases wider options. Hybrid ORs permit surgeons to work in an efficient manner to achieve best outcomes. A variety of medical professionals work in hybrid ORs such as imaging professionals, surgeons, and other specialists to ensure complex needs of patients are met more efficiently
