Market Dynamics:

As the coronavirus pandemic spreads and its humanitarian impact grows, companies that help meet basic necessities, such as providing food and other key commodities to customers securely, are becoming increasingly impacted. The USD 900 billion per year global packaging business is on the front lines, with food packaging being its major area of activity. The coronavirus outbreak has already resulted in some of the biggest drops in demand for certain types of packaging in recent memory, while speeding growth for others—such as packaging for e-commerce goods, which are quickly becoming lifelines in this new world. Many packaging companies are facing new hurdles as a result of these changes.
