IMARC Group expects the global aerosol paints market to grow at a CAGR of around 5% during 2021-2026. Aerosol paints, also known as spray paints, are one of the most common ways of applying paint. They are used on various surfaces, including glass, wood, metal, and plastic, for providing protection and improving the overall aesthetics. They have unique storage, atomization, and application methods compared to conventional paints. As they are available in different forms, such as stains, glossies, enamels, and flats, their demand is escalating around the world.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
