

Revolutionizing Legal Documents For Innovators

GoNDA announces the launch of the app for iOS and Android

CHICAGO, IL, USA, November 8, 2021 /EINPresswire.com/ -- [goNDA](#), an emerging Legal tech startup provider of tools and services that affordably protect and empower people to live a just and secure life, announces the launch of the goNDA app for both iOS and Android devices. Built for [real-time usability](#) and amicable relationships, the unveiling of the new app delivers a unique mobile app experience. goNDA offers a selection of ready-to-use legal templates so everyone can create and execute [legal documents](#) for personal and business needs. Now, at their convenience, business owners, entrepreneurs, and creative talents—musicians, models, and actors—have streamlined access to personalized legal documents to protect their ideas, business, and families with goNDA.

The self-service document execution feature guides the user through the document creation process removing the complex legal language questions which are usually too hard to answer without legal advice. In addition, goNDA offers in-app knowledge resources so users always have an understanding of the importance of the available templates. Not many people understand the legal contracts they are signing, and unfortunately, there's no excuse for being uninformed of the law when it comes to disputing a legal proceeding. The application's "Knowledge Center" provides users with understanding, and as a future in-app feature, a curated "Legal Marketplace" makes sure they're finding the right legal support. GoNDA also offers in-app notary services, so users can certify any document completed within the app. For so many people, legal support can seem impossible due to cost and awareness which can lead to several societal disadvantages including economic instability.

goNDA CEO, Amanda Moutrage explains the legal industry today as "Without lengthy waitlists and impersonable support, affordable legal services do not exist. The mission of goNDA is to create a legal self-service tool that enables the majority of us who are striving to protect our intellectual property and families without all the time consuming red tape, and without the typical price tag."

goNDA App Now Available for iOS and Android.

The app is free to download and there is no charge to access it's Knowledge Center and Legal Marketplace. Starting at \$5 a month to access and complete ready-to-use legal templates, goNDA will enable and protect our communities to bridge the gap between accessibility and affordability for legal support.

The goNDA mobile app is now available to everyone via Google Play and the App Store.

About goNDA

goNDA is a self-service legal mobile application that offers real-time usability of ready-to-use templates at affordable prices for everyone.
