The Global Ampicillin Market is majorly driven by growing geriatric population, rising R&D investments by major players, and regulatory concerns to control the antibiotic resistance problem. The ampicillin capsules segment is growing at a highest CAGR as it is used to treat infections that are caused by certain types of bacteria and the administration of 500 mg dose of ampicillin capsules results in an average peak blood serum level of approximately 3.0 mcg/mL. North America dominated with a significant market share due to an increase in incidence of sexually transmitted diseases such as gonorrhea and syphilis in the U.S. Asia Pacific market is growing at a highest CAGR owing to rise in the number of antibiotic manufacturers and increase in incidence and mortality rate of infectious diseases, including pneumonia, in emerging markets, such as India and China.
