The increased adoption of cloud and technologies have also increased the threat to cyber security. Majorly the business information is stored online which in turns prone to the cyber-attack. Since, the board portal majorly stores highly confidential data, and if this information is mishandled or compromised it can cause a huge substantial harm to the company.

Impact of COVID-19 on Board Portal Market:

- The emergence of COVID-19 pandemic has severely affected almost all industries across the globe. Further, lockdown enforcements and restrictions on movements of non-essential goods as well as resources in various countries has disrupted supply chain of electronic components & networking equipment. This, has led to delay in supply of electronic components required in manufacturing of the network equipment.

- Companies have continued to expand cloud services and application development service during the pandemic. Before the pandemic took hold, various organizations were providing manual release of applications to customers.

- New learnings among companies with respect to work-from-home (WFH) and data accessibility during the lockdown period has resulted in increasing enquiries for space and services at data centers and this trend is expected to create opportunities in for the market during the forecast period.
