### Phase Three

This phase will begin the final planning of Metaverse after recruiting the required team. And finally, the world's kindest and nicest metaverse will be created. KIND will be the main currency in this Metaverse.

### More Phases and Projects

The founder says Kind crypto has a lot more to offer than these phases. As more phases and secret projects will be revealed over time and they all will be powered by KIND tokens.

Pankaj Sharma, the founder of Kind Crypto further adds, "Blockchain has the potential to transform the way we live and help society. The idea behind Kind Crypto is to utilize blockchain for greater transparency in products, services, and accountability".

Sharma's vision is to promote KIND as a globally acceptable token for almost everything we do. From buying products to listening to music, playing video games, owning NFTs, and having amazing experiences in Metaverse. KIND token will be one common thing among these activities.

The first version of the website and white paper has been launched and the further features are in development. The project is gaining followers in its Telegram group at a decent pace since the token's launch on PancakeSwap. The token has already been listed on Coin Mooner, Coin Sniper, Coin Vote, Fresh Coins, and Coins Gods.

Kind goes with the slogan "lifting the greater good". The meaning of this goes much deeper than it appears to be. In the words of the founder of Kind Crypto, Sharma. "Kind aims to lift the good side of every human being, doesn't matter their social or financial status. First of all, we are all humans. The richest person in the world also deserves as much kindness as a janitor does. We aim to give the message of being kind to everyone. Along with that provide world-class products and services.

KIND was launched on PancakeSwap with 20 Trillion Liquidity. Liquidity is now locked till October 3, 2030.

Join the kind movement and be a part of the unstoppable force of Kindness.
