A fluid Management and Visualization system are used to
balance body fluid in order to prevent complications
associated with an undesired fluid level. It is also used for
the early diagnosis of critical medical conditions. Fluid
management systems perform functions such as fluid
irrigation, fluid warming, fluid filtration, fluid deficit

monitoring, etc. Growing inclination towards minimally invasive surgeries and technological

advancements in fluid management and visualization system products are expected to supplement the market growth

The Fluid Management & Visualization systems market has been segmented based on product type, application, and geography. On the basis of product type, the market is segmented into fluid management devices, fluid management disposables and accessories, and visualization systems.

Comprehensive competitive analysis and profiles of major market players, such as

Smith & Nephew, Stryker Corporation, ConMed Corporation, B Braun Melsungen, AngioDynamics, Inc., Richard Wolf GmbH and Ecolab, Inc. are some key players in this market.

Covid-19 Scenario:

- 1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.
- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.
- 3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.
