How to Mine Bitcoin? Join Rock Hash to Share Mining Bonus!

LOS ANGELES, CALIFORNIA, UNITED STATES, November 12, 2021

/EINPresswire.com/ -- The year 2021 is the year when bitcoin goes mainstream. Bitcoin is more widely recognized by institutions, businesses, and people around the world. On September 7th, it was even recognized by El Salvador as the national legal tender.

On October 20, the first US exchange-traded fund (ETF) that linked to bitcoin was launched.

Trading volume of the first day was the second-highest on record, which is nearly \$1 billion, seconding only to first-day trading volume of the Carbon Transformation Reserve Fund of asset management giant BlackRock.

Due to the great volatility of the cryptocurrency market, mining with relatively stable yields has attracted many investors. Crypto mining industry has also entered the stage of rapid development, with the heat of cryptocurrency mining, many bitcoin mining enterprises

ushered in the opportunity to go public.

It is known that more than 20 bitcoin mining enterprises have been successfully listed through acquisition, reverse acquisition, or direct listing application. This makes it possible for mining enterprises to access to excess return through the capital market putting the high profits that comes with the mining itself.

However, all of this has nothing to do with most of the casual miners. Even though many senior miners have been rooted in the industry for years, and may have earned high returns, they are still vulnerable in the mining industry: they may be unable to find mine hosting machines, or they may be trapped in a pit by an malicious platform.

Some miners began to try to build their own mine field and become mine owners. However, most miners do not have the ability to build mine, mine self-construction is still not a main trend.

So, do miners always have to be in the downwind? Recently, a new version of [Rock Hash](#) official site was launched!

Users do not need to find a site to deploy mining machines, only need to register an account and purchase a product on the website, they can obtain mining outcomes every day, enjoying professional services of the platform including procurement of

high-quality mining machine, selection of mine, link mining pool, operation, and maintenance management, maximizing the reduction of mining costs, so that everyone can mine. For miners, it is without doubt the best opportunity ever!

Rock Hash is the world's leading hash power trading platform, providing users around the world with one-stop comprehensive mining services and easy access to the mining experience. The website is available in seven languages, including Chinese, Japanese, Korean, English, Russian, Thai and Arabic, to meet the needs of users in different countries for mining investment.

Currently, Rock Hash offers a variety of products for different users, with three main currencies, including [BTC](#), ETH and FIL. The high cost-effectivity and income stability of the product makes Rock Hash become a wise choice for more and more users.

To celebrate the launch of the new version, Rock Hash is launching a series of promotions. Customers who purchase the products now can not only enjoy daily mining output, but also
