Rock Hash - New Wealth Opportunities Behind the Global Crypto Burst!

LOS ANGELES, CALIFORNIA, UNITED STATES, November 18, 2021

/EINPresswire.com/ -- If an investor was holding \$500000 cash ten years ago, what asset allocation would be chosen to get the ideal return on investment? "Stocks, bonds, funds, real estate..." But ten years later, with the outbreak of the global epidemic, the way of life and work of human beings all over the world has been greatly affected and changed.

The graphic features a dark background with a grid pattern. In the top right corner, the 'ROCK HASH' logo is displayed with a lightning bolt icon. The main text reads: 'The Best Mining Time is Coming, Rock Hash Accelerates Global Strategic Layout'. To the right of the text are four circular icons: a large Bitcoin symbol, and three smaller icons representing Ethereum, Filecoin, and another cryptocurrency. Below the graphic, the text reads: 'Rock Hash - New Wealth Opportunities Behind the Global Crypto Burst1'.

In order to meet many challenges, such as the global economic recession and the decline in employment during the epidemic period, central banks led by the Federal Reserve have launched the largest quantitative easing policy in human history. Zero interest rates and additional natural currencies have brought great changes to the traditional asset pricing system and the orientation of wealth allocation!

The "Matthew effect" occurs in global wealth differences

The monetary easing policy launched by global central banks in response to the recession caused by the epidemic has become an important force driving up the prices of investment categories such as stocks, property, gold, and bulk commodities. The sharp rise in asset prices has not only created a group of rich people, but also exacerbated the gap between rich and poor domestically and all over the world.

This is why many industry insiders believe that suffering a beating is inevitable when participating in a secondary market fight, as the one who get ahold of the chips in the capital market game is always the powerful one, and heavy losses or even bankrupt is always "retail investors" would suffer from. Asset curing has become an unavoidable topic in most countries in the world.

With general negative global GDP growth in 2020, the wealth of the world's 25 richest super-rich rose by \$255 billion, while the assets of the world's richest five increased by 31 per cent and total assets by \$1.8 trillion. In 2020, when the epidemic raged, 12.2% of the world's population owns 84.9% of the human wealth, which is the most serious moment of wealth differentiation in human history.

The serious internalization of wealth pressurizes more and more people to look for safe haven assets around the world. Cryptocurrencies led by BTC, has gradually entered the public vision, and has become a popular new type of investment assets.

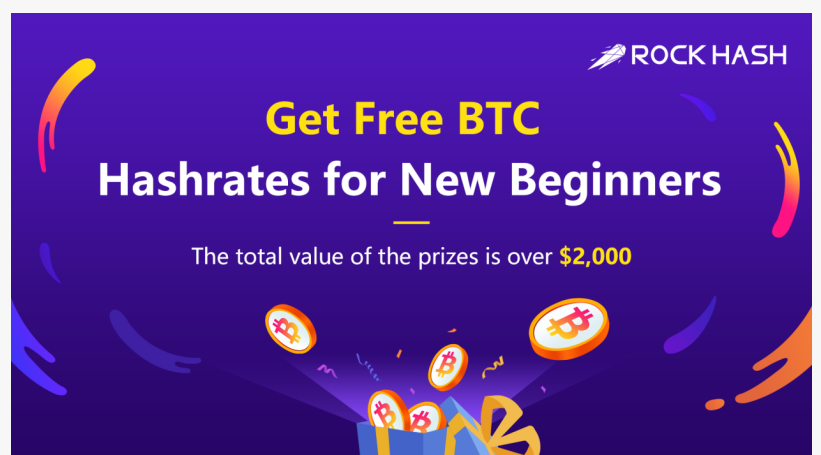

Basic Support Force of Crypto Market – Mining

Nakamoto led you to know Bitcoin, which is now the safest computer network on the planet in the field of cryptocurrency. With the rapid development of its ecosystem, [bitcoin price](#) has continued to climb since halving in 2020, breaking through the \$60,000 mark at one point, showing amazing trading capacity in the secondary market and igniting the mining enthusiasm of many miners.

Led by Bitcoin, as well as similar cryptocurrencies networks such as ETH and FIL, new gold diggers have emerged. In this digital borderless democratic world, miners rely on computing power to compete with each other in an orderly manner and dig out more valuable currencies, thus ensuring the continued prosperity of the encryption market, ensuring the stability of supply and demand, and constantly injecting fresh blood into the allocation of wealth.

With the rising market value of global cryptocurrency and the spread of bitcoin heat around the world, the mining army is also gradually growing, from the beginning of the small miner with low allocation can get a block reward, to the increasing difficulty coefficient of the computing power, allocation, electricity charges and production capacity have also become the main problems that gradually haunt the miners. Safety, efficiency, calculation competition and income stability have also become a new concern of the miner group.

Rock Hash - Mining Platform of Cloud Hash Power

As the world's leading hash power trading platform, Rock Hash, with its rich mining experience and industry resources, provides one-stop comprehensive mining services for hundreds of thousands of users around the world, which fundamentally reduces the difficulty of users participating in mining.
