

# Peptide Therapeutics Market Report 2021-26: Share, Size, Demand, Outlook, Future Growth

*According to the latest report by IMARC Group, The global peptide therapeutics market reached a value of US\$ XX Billion in 2020.*

SHERIDAN, WYOMING, UNITED STATE, November 11, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group "[Peptide Therapeutics Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)", The global peptide therapeutics market reached a value of US\$ XX Billion in 2020. Looking forward, IMARC Group expects the market to grow at a CAGR of XX% during 2021-2026.

Peptides are selective signaling molecules that bind to specific cell surface receptors, such as G protein-coupled receptors (GPCRs) or ion channels, and trigger intracellular effects. They are extensively utilized in the pharmaceutical industry to design regenerative therapeutics that target a wide range of cells and influence their responses. Peptide therapeutics are less toxic, well-tolerated, and relatively safer than other treatment options. As a result, they are gaining traction in clinical practices for managing cancer, infectious diseases, metabolic disorders, injuries, etc.

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

## Market Trends:

The escalating prevalence of chronic diseases and improving access to medical facilities are positively influencing the peptides market. Furthermore, peptide therapies are also utilized in cosmeceutical surgeries to slow down the process of skin aging, which is catering to the growing consumer consciousness towards physical appearance. Apart from this, with the emergence of novel synthetic strategies that minimize injection frequency and improve stability, peptide therapeutics are being extensively used in injections for diabetic patients. Moreover, the rising trend of personalized and targeted treatments is further bolstering the demand for multifunctional peptide-based materials. This, along with the increasing funding to develop new

peptide therapeutics for treating inflammatory autoimmune diseases, is expected to fuel the market growth in the coming years.

Breakup by Type:

Innovative

Generic

Breakup by Type of Manufacturer:

Outsourced

In-house

Breakup by Synthesis Technology:

Solid Phase Peptide Synthesis

Liquid Phase Peptide Synthesis

Hybrid Technology

Breakup by Routes of Administration:

Parenteral

Oral

Others

Breakup by Application:

Gastrointestinal Disorders

Neurological Disorders

Metabolic Disorders

Cancer

Others

Market Breakup by Region:

North America (United States, Canada)

Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, Others)

Europe (Germany, France, United Kingdom, Italy, Spain, Russia, Others)

Latin America (Brazil, Mexico, Others)

Middle East and Africa

Competitive Landscape with Key Player:

Amgen Inc.

Apitope International NV  
Arch Biopartners Inc.  
AstraZeneca plc  
Circle Pharma Inc.  
Corden Pharma GmbH  
F. Hoffmann-La Roche AG  
Ipsen Group  
Lonza Group AG  
Novo Nordisk A/S  
Pfizer Inc.  
Teva Pharmaceuticals Industries Ltd.  
Zealand Pharma A/S.
