Covid-19 Scenario:

- 1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.
- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.

Oral Doxycycline Hyclate

3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.

Generally doxycycline hyclate is not prescribed to lactating & breastfeeding patients. Doxycycline hyclate is also not prescribed to children below 8 years because of it can cause permanent yellowing of their teeth unless it is a life threatening condition such as anthrax.

Pharmaceutical and biotech companies together with governments around the globe are working to address the COVID-19 outbreak, from supporting the development of vaccines to planning for medicine supply chain challenges. Currently, around 115 vaccine candidates and 155 molecules are in the R&D pipeline. Moreover, commonly used drugs such as Hydroxychloroquine have witnessed a dramatic surge in demand for the management of COVID-19. Such high demand for these drugs has presented huge opportunities for manufacturers of COVID-19 management drugs, as many developed countries are facing shortage of these drugs.

Top Impacting Factors

1) Surge in cases of bacterial infections such as urinary tract infection, pneumonia, & respiratory diseases, rise in hospital acquired infections, increase in demand home based treatment, surge in demand for treatment of anthrax, and rise in unhygienic practices are the key factors that drive the growth of the market.

2) However, adverse effects related to doxycycline drugs and presence of alternative treatments can hinder the growth of the market.

3) Contrarily, government initiatives for regulatory approvals and spreading awareness regarding bacterial infection treatment are expected to offer lucrative opportunities for the expansion of the market.
