Radiotherapy Market by Type (External Beam Radiation Therapy, Internal Radiation Therapy/Brachytherapy, & Systemic Radiation Therapy), & End User (Hospitals & Clinics and Ambulatory Surgical Centers)"

Allied Market Research

Radiotherapy devices are used to treat cancer patients by exposing the cancerous tissues to X-rays, gamma rays, and charged particles. The market is driven by growth in number of cancer patients, increase in geriatric population, rise in adoption of radiotherapy devices and procedures, owing to surge in number of awareness campaigns about the benefits of radiotherapy, and technological advancements in radiotherapy devices. However, dearth of skilled personnel and difficulty in tumor visualization restrict the market growth. Furthermore, growth opportunities in emerging markets and increase in demand for cancer treatment are expected to provide numerous opportunities for market growth during the

forecast period.
