The outbreak of coronavirus has negatively impacted the onion oils industry along with all stages of supply chain and value chain. Presently, the supply chain is far more complex as compared to what it was a decade ago. The COVID-19 pandemic has not only hampered production facilities but also disrupted supply chains such as material suppliers and distributors of the onion oils market globally, resulting in loss of business, in terms of value sales. Moreover, concerns of hair loss have been high among millennials, specifically in Asia-Pacific region. They are keen to try hair products and services including onion oil that are new in the market and promotes healthy hair growth and controls hair related issues. This in turn has driven the growth of onion oil

market.

Furthermore, by distribution channel, the online store segment is anticipated to be the fastest growing segment, in terms of value sales during the forecast period. This is attributed to the fact that e-commerce is becoming a popular medium for purchase of hair care products including onion oils among customers. This is attributed to easy availability of onion oils and benefits provided by these stores such as information about product functional attribute, time-saving features, and facility of home delivery to customers.
