Police Officers wear ballistic vests as part of their daily uniform, however, the K-9’s who are putting themselves between the Officer and an armed suspect are often not provided the same protection. 100% of the funds raised are used to purchase K-9 ballistic vests and other equipment to provide protection against guns and knives when the K-9’s are used to help track

and apprehend armed suspects, and to purchase opioid reversal kits for narcotics K-9's who may be exposed to inhaled or ingested drugs. We donate these items to any Police Department in need, across the USA.

About the Charity

The DeLisle K-9 Officer Safety Foundation began raising funds for K-9 Officer ballistic vests in the fall of 2016 after hearing of a K-9 shot and killed in the line of duty. These vests cost an average of \$1,200 each and are usually not included in police department budgets. Since that time they have become a 501(c)3 and have raised enough funds to purchase 31 bulletproof K-9 vests, helping to protect K-9's throughout Delaware and across the country. Each vest purchased helps to protect the K-9, which in turn protects our dedicated Police Officers!

One Small Step

To commemorate the 50th anniversary of the historic Apollo 11 Moon Landing on July 20, 1969, while remembering the astronauts who have given their lives for our nation's space program. The attached ribbon includes the inspirational words of Neil Armstrong: "That's one small step for [a] man, one giant leap for mankind."

About the Charity

In the wake of the Challenger accident in 1986, the Astronauts Memorial Foundation (AMF) was founded. The AMF honors the past and inspires the future, memorializing those astronauts who have sacrificed their lives for the nation and the space program by sponsoring the national Space Mirror Memorial, and by implementing innovative educational technology programs.

The Astronauts Memorial Foundation captures the technology developed in the United States' space program and applies it to the field of education. They partner with the National Aeronautics and Space Administration to provide technology training to educators throughout the nation with a particular emphasis on space-related technology. In addition, at The Center for Space Education they offer space-related educational opportunities for individuals, and, in doing so, improve the quality of the workforce in the space industry.
