

Dairy Enzymes Market Study Report Based on Size, Shares, Opportunities, Industry Trends and Forecast to 2027

Dairy Enzymes Market Size – USD 593.2 Million in 2019, Market Growth – at a CAGR of 7.2%, Market Trend – Increasing usage of microbial rennet

VANCOUVER, BC, CANADA, November 12, 2021 /EINPresswire.com/ -- The global [dairy enzymes market](#) would reach value of USD 999.8 Million by 2027, according to a current analysis by Emergen Research. This growth of the market can be attributed to the increasing prevalence of lactose intolerance among people. Moreover, increasing utilization of hydrocolloids by dairy-manufacturing companies to enhance the texture of dairy products is expected to drive the market for dairy enzymes during the forecast period. Furthermore, growing preference of obese people for low-fat and healthy food is also contributing to the demand for dairy enzymes.

North America accounted for the largest share of the global dairy enzymes market in 2019. Increasing demand among health-conscious people for innovative dairy products that are sugar-free, lactose-free, and enriched in prebiotic fiber is driving the market for dairy enzymes in the region.
