

Symmetry Software Announces New UI & API for Symmetry Payroll Point®

Symmetry Software has launched an updated and modernized version of our world-class local tax finder, Symmetry Payroll Point®, which includes a RESTful API.

SCOTTSDALE, ARIZONA, UNITED STATES, November 16, 2021

/EINPresswire.com/ -- Symmetry Software has announced the launch of an updated and modernized version of their world-class local payroll tax finder, [Symmetry Payroll Point](#).

Symmetry Payroll Point® is the leading local tax withholding software in the payroll tax compliance industry. It quickly identifies and accurately determines complex federal, state, and [local taxes](#) based on work and residential addresses. It also leverages Symmetry's cutting-edge geocoding processes to convert U.S. Postal address data into GNIS coordinates for the most precise rooftop accuracy when paired with Symmetry's proprietary geospatial tax boundary shapefiles.

The new version of Symmetry Payroll Point includes a RESTful API and Portal that provides clients with an optimized user experience. The new features allow clients to perform more tasks autonomously and rely on more powerful geospatial tax visualization. The [minimum wage](#) finder module also received an update due to the Symmetry Payroll Point redesign with more minimum wage compliance data than before.

The API is ideal for integration into payroll systems and for large employers looking for simplified and automated integration of local tax determination. It embeds directly within payroll platforms to pull employee information and automate tax withholding settings to complete payroll and stay compliant.

The Portal is a modern and powerful user interface to return precise taxes using the Payroll Point Maps and Batch technology. Customers can troubleshoot addresses to focus on challenging home and work address combinations and gather detailed tax withholding for
