and CO-Founder*

Cashed Up and Exploring the Fortuna Project in Ecuador

Fortuna Project summary — location, access, and  
attributes. The Fortuna project totals 550 sq km and is  
located in the Azuay, Zamora Chinchipe and Morona  
Santiago provinces in Ecuador. The project totals twelve  
(12) contiguous 25-year mining concessions. These  
concessions were privately held from 2006–2018 and are  
located near major discoveries, including: 1) Lundin Gold's  
(LUG-TSE; not covered) Fruta Del Norte (in production), 2)  
EquaCorriente's Mirador, 3) Dundee Precious' (DPM-TSE;  
not covered) Loma Larga, and 4) Solgold's (SOLG-TSE; not  
covered) Cascabel project. As described below, the current

focus is on the Wayka discovery on the Fortuna 3 and 4 concessions, which has limited road  
access. From the current base camp, the exploration team can travel one hour by road, followed  
by one (1) hour by horse. (Laurentian Bank Securities Nik Ristic, MFE • Associate)

"Lucky Minerals Inc. is exactly the type of company that our followers and subscribers are looking for. unique, innovative, and exceptional. As the Coliseum continues to expand, we are extremely excited to be adding Lucky Minerals Inc.. to our digital awareness platform. Our commitment has and will always be to showcase exceptional

companies with tremendous growth opportunities for the future. And that is exactly what we have done by adding such a forward-thinking company in such a unique jurisdiction for mining"

About Lucky Minerals Inc.

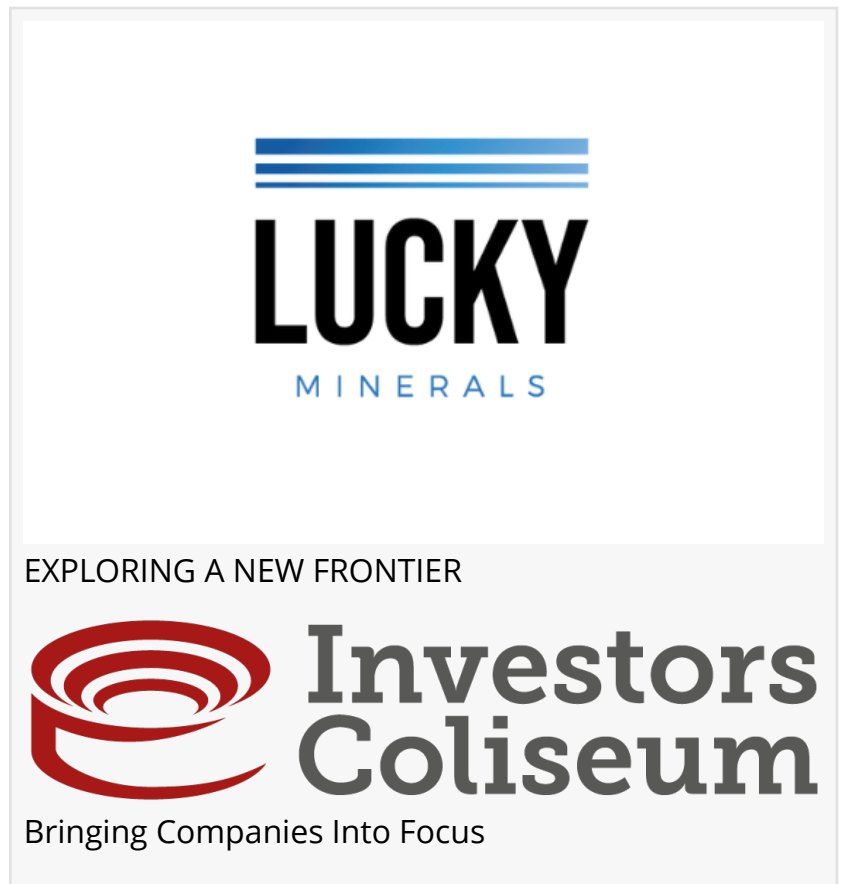

Lucky Minerals Inc is a Canadian-based gold exploration company with its key, early-stage Fortuna project located in Ecuador. LKY controls a significant land package totaling 12 mining concessions at the intersection of the Azuay, Zamora Chinchipe, and Morona provinces, in relatively close proximity to other known mines and development-stage projects. Of the 12 concessions, LKY is focused on Fortuna 3 and Fortuna 4, and specifically the recently discovered Wayka area. This is considered a highly prospective epithermal gold target in close proximity to porphyry targets. A combination of encouraging grab and trench samples, combined with geophysical and geochemical results supports advancing Wayka to the drilling stage to test higher priority targets and depth extent of mineralization discovered at surface. LKY recently completed a \$3.87M unit financing to complete this initial drilling.
