number of competitive examinations

and certifications, along with rising population of young labor force are factor expected to drive market revenue growth

Reports And Data

The global [Assessment Services Market](#) size is expected to reach USD 12.26 Billion in 2028 and register a revenue CAGR of 7.1% over the forecast period, according to the latest report by Reports and Data. Increasing number of young jobseekers as well as entrepreneurs, coupled with rising adoption of online assessment services for conducting various types of aptitude tests are some of the major factors driving market revenue growth. Assessment services are offered on Internet platform where individuals can find new and varying types of jobs and employment and increase scope of income-earning opportunities.

Corporate e-Learning enables organizations to decrease HR costs associated with training, onboarding, recruitment, retainment, and appointment via automated processes, sophisticated reporting, and minimal or no need for hiring talent department to manage and provide training or continued education. Online examination conducted for assessments or tests are done on a fully automated platform. Rising preference for online assessment services across the corporate sector and by government of various countries and for online exams is expected to fuel market growth in the coming years.

Budget concerns, connectivity issues, and improper utilization of assessment tools are major factors that could hamper revenue growth of the global assessment services market. Technologies are not always reliable as there might be Internet or connectivity issues, power outages, and others. Internet connectivity is still not available in isolated areas or rural villages

and some underdeveloped regions. In case of a concurrent number of exams, Internet connectivity can be a hurdle for smooth execution of online examinations.

Increasing adoption of assessment services, including for examinations such as Predictive Index Behavioral Assessment Test (PIBAT) and Test of English as a Foreign Language (TOEFL), among others is another factor driving expected to drive revenue growth of the global assessment services market. Predictive index behavioral assessment test is generally used by organizations to secure candidates who are hardwired to be a good fit, to design teams that work well and excel, and to manage employees in a way that encourages them to perform best and remain at the top of their game. It is a stimulus-response tool that measures a person's motivating needs and drivers. Test of English as a Foreign Language (TOEFL) is an aptitude assessment test used to measure the English language ability of individuals from non-native speaking countries wishing to enroll in the English-speaking universities.
