Due to increased demand for technologically sophisticated laryngoscopes, which are easier to use and require less time, the market is likely to rise at a significant rate. The anaesthesia video laryngoscope market is predicted to develop due to rising demand for technologically sophisticated laryngoscopes. The use and availability of anaesthetic video laryngoscopes is fast growing, and these items are simple to use. For anesthesia providers to adopt quickly, as it allows healthcare professionals to safely manage more patients, such as those who might need fiberoptic intubation.

Video laryngoscopy has a number of benefits for treating difficult situations, including faster intubation times and reduced trauma for patients. Professionals can now use the most up-to-date technology to make intubation easier and less traumatic for the patient. A large variety of video laryngoscopes are available, and the number is always growing. Many older devices are being changed as well. Companies that make anaesthesia video laryngoscopes are concentrating on developing and manufacturing technologically improved goods. It's a high-resolution, portable, and durable technology for clinicians in pre-hospital and hospital settings.

Furthermore, in order to achieve large market share, the manufacturers are concentrating on strategic collaborations and agreements. For example, Dilon Technologies purchased the CoPilot VL video laryngoscope for an unknown sum in January 2018 to broaden its airway and anaesthetics portfolio. Followed by this acquisition, the company launched CoPilot VL video

laryngoscope in February 2018, an advanced airway management device to help providers have the best view of the airway when placing breathing tubes.

Key Takeaways of the Anesthesia Video Laryngoscope Market:

- The global anesthesia video laryngoscope market size is expected to exhibit a CAGR of 6.8% over the forecast period, owing to increasing demand for technologically advanced laryngoscopes.
- Among end user, the emergency department segment is estimated to hold the dominant position in the anesthesia video laryngoscope market, in 2017 due to increasing usage.
- North America holds a dominant position in the global market, owing to higher number of technologically advanced healthcare centers adopting these systems.
- Key players operating in the global anesthesia video laryngoscope market include Medtronic plc, Ambu A/S, Verathon Medical, Karl Storz, Teleflex, Daiken Medical Coopdech, Pentax-AWS, and Vyaire Medical.
