November 16, 2021 /

EINPresswire.com/ -- The global demand for furniture is expected to increase due to rapid urbanization and high purchasing power of millennial generation. The residential segment dominates the market due to growing phase of infrastructure and real estate market. Moreover, advance technology of manufacturing has lowered the cost and time for manufacturing. However, manufacturers believe that rise in raw material prices would have a long-term impact on the market and hamper growth of market during the forecast period

Furniture Market

According to a new report published by Allied Market Research, titled, "[Global Furniture Market](#) by Type, Distribution Channel, and Region: Global Opportunity Analysis and Industry Forecast, 2018 - 2025," the global furniture market size was valued at \$583,159 million in 2017 and is projected to reach \$800,596 million by 2025, registering a CAGR of 3.5% from 2018 to 2025. Furniture are objects used to support various human activities such as seating, eating, sleeping, and others. Furniture are also used to hold and position an object at certain required height either to store things or for aesthetic appeal. Depending on end use, furniture designs can be modified through machine-based processes and handcrafting. Furniture manufacturing involves highly skilled and creative professionals.
