

The Oxygen Market Is Focused On Integration In Various Industries Through Innovative Utilization Methods

*The Business Research Company's
Oxygen Global Market Report 2021 -
COVID-19 Impact And Recovery*

LONDON, GREATER LONDON , UK,
November 16, 2021 /
EINPresswire.com/ -- Companies
involved in the [oxygen market](#) are
developing innovative ways to utilize
oxygen in various industries such as
medical, chemical etc. The rising need
among patients across healthcare
services acts as a driving force for the
companies to find new innovating ways
to improve oxygen delivery. In order to
improve the oxygen delivery and to
monitor the oxygen dosage to patients
in respiratory care facilities, Camcon
Medical in 2018 introduced Binary
Actuation Technology (BAT). BAT is an
innovative solution that aids in
providing accurate dosage, reduces
wastage by provided cost effective
solution to the patients who require
oxygen therapy. It is through such
innovative methods that entities
involved in the oxygen market are able
to improve economic benefit of the
products.

Major players covered in the global
oxygen industry are Linde Group,
Praxair Technology Inc, Air Liquide,
Taiyo Nippon Sanso, Yingde Gases, Air

Global Oxygen Market
Forecast Market Size, 2020 – 2025, \$ Billion

The global oxygen market size is expected to grow from \$26.15 billion in 2020 to \$27.26 billion in 2021 at a compound annual growth rate (CAGR) of 4.2%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$37.29 billion in 2025 at a CAGR of 8%.

Increasing prevalence of various diseases related to breathing problems contributed to the global oxygen market's growth by increasing use of oxygen for medical purposes. Diseases such as Chronic Obstructive Pulmonary Disease (COPD) are more prevalent in the geriatric population. COPD is a type of obstructive lung disease that results in long-term breathing problems. COPD requires the use of oxygen concentrator, which is a device that improves the level of oxygen in blood in patients and addresses their breathing problems. According to the United Nations (UN), in 2020, there are an estimated 727 million persons aged 65 years or over worldwide and expected to reach 1.5 billion by 2050. Thus, the increased number of such cases has surged the demand for portable oxygen concentrators, therefore driving the oxygen market's growth.

TBRC's global oxygen market report is segmented by product type into medical oxygen, industrial oxygen, others, by application into cosmetics, pharmaceutical, automobiles, mining, mineral processing applications, by application into metallurgical industry, chemical industry, health care industry, others.

[Oxygen Global Market Report 2021](#) - By Product Type (Medical Oxygen, Industrial Oxygen), By Application (Cosmetics, Pharmaceutical, Automobiles, Mining, Mineral Processing Applications), By Application (Metallurgical Industry, Chemical Industry, Health Care Industry), COVID-19 Impact And Recovery is one of a series of new reports from The Business Research Company that provides oxygen market overview, forecast oxygen market size and growth for the whole market, oxygen market segments, and geographies, oxygen market trends, oxygen market drivers, restraints, leading competitors' revenues, profiles, and market shares.
