SHERIDAN, WYOMING, UNITED STATES, November 17, 2021 /

EINPresswire.com/ -- According to IMARC Group latest report titled "[Air Taxi Market](#): Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026", the market is currently witnessing strong growth.

The Global Air Taxi Market to exhibit moderate growth during the next five years. The air taxi refers to an energy-efficient and lightweight aircraft used for traveling over short distances. Some of the commonly used air taxis include parallel hybrid, electric, turboshaft and turboelectric variants. These air taxis are widely utilized for covering distances between areas that are not served by scheduled airlines and are limited to a maximum cargo and passenger capacity. They operate through smaller local airports with little or no air traffic with closer proximity to passenger destinations.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

The global air taxi market is primarily being driven by significant growth in the aviation industry, along with the increasing preference for short-distance travel among the masses. Moreover, the widespread utilization of air taxis in the transportation industry for delivering goods and services is favoring the market growth. In line with this, the increasing requirement for enhanced flexibility in travel schedules is also contributing to the market growth. Other factors, including the launch of air taxis with automated pilot solutions and improved battery and power systems,

along with the implementation of favorable government policies promoting air taxies in urban areas and smart cities, are creating a positive outlook for the market.
