The growth of the global ophthalmic devices market is majorly driven by rise in prevalence of eye-related disorders and rapid technological advancements in ophthalmic devices such as intraocular lenses (IOLs). In

addition, increase in focus toward customer training and education for the use of ophthalmic devices, which would help in building the staff skills, and surge in awareness related to devices used in ophthalmology notably contribute toward the growth of the global market. Furthermore, increase in R&D activities for the treatment of vision errors is driving the ophthalmic devices

market growth. However, low awareness regarding eye-related diseases and dearth of skilled professionals are expected to hamper the growth of the market. Conversely, emerging countries such as China and India possess high growth potential, owing to improvement in healthcare infrastructure in these countries.
