

Adaptive US introduces Closed Captioning option for its e-Learning Videos

Adaptive US has released the feature of Closed Captioning for all its e-learning videos.

MIDDLETOWN, DELAWARE, USA, November 17, 2021 /EINPresswire.com/ -- [Adaptive US](#) is pleased to announce the release of the "closed captioning" feature on its e-learning videos for enhancing its user experience and making them disability-friendly. This feature will go a long way towards creating a smooth customer experience.

Closed Captions or Subtitles will make videos more accessible to a wider audience, including non-native English-speaking students, students with hearing disabilities, autism, learning disabilities, etc., and anyone who wants to watch the video without voice/sound. Students will find it easier to assimilate and follow what is discussed in the video and make their notes. It will also help boost user engagement.

"We're pleased to introduce this feature for our Core IIBA eLearning Videos," said LN Mishra, Co-founder and COO at Adaptive US. "Being a leading Ed-Tech firm, our client base is truly global; hence this feature helps cater to the diverse student base. This also facilitates visual learning, since they prefer the videos with subtitles to better retain the information."
