

# Psoriasis Drugs Market is Projected to Grow at a CAGR of 12.31% from 2021 to 2028

*The global Psoriasis Drugs market seems to reach USD 90.52 billion by 2028, at a CAGR of 12.31% from 2021 to 2028.*

NEWARK, UNITED STATES, NEW JERSEY, November 17, 2021 /EINPresswire.com/ -- As per the report published by The Brainy Insights, the [global psoriasis drugs market](#) seems to reach USD 90.52 billion by 2028, at a CAGR of 12.31% from 2021 to 2028. North America region is accounted for the highest market value of USD 13.27 Billion in 2020. This is due to the fact that this region has established healthcare infrastructure; there is also the prevalence of psoriasis in this region. Asia Pacific had the second-largest market value of USD 9.72 Billion in 2020. The unmet clinical requirement propel this market in the region. The rise in per capita income of the people in the region have changed the lifestyle of the people, the unhealthy lifestyle and eating habits have led to an increase in the cases of Psoriasis.

Key players for the global Psoriasis Drugs market include AbbVie Inc., Amgen Inc., Johnson & Johnson, Novartis AG, Eli Lilly & Company, AstraZeneca, Celgene Corporation, UCB, Merck, Boehringer Ingelheim and LEO Pharma among others.

The therapeutic class segment is divided into Tumor Necrosis Factor Inhibitor, Interleukin Inhibitors and others. Tumour Necrosis Factor Inhibitor is accounted for the highest market value of USD 14.42 Billion in 2020. This is because of its application in curing the Psoriasis. The Interleukin inhibitors are showing the highest CAGR in the forecasting period as it is safer to use and delivers a promising result. The treatment segment includes topicals, systemic, and biologics. The biologics account for 47.34% of market share in 2020. This is giving rise to tailored made plan solution, bases on individuals, this mostly possible because of the rise in availability of predictive biomarkers. Thou the developing biological treatment may block the immune system of a specific area, but this is becoming very effective in curing psoriasis. This scenario is creating an opportunity for the psoriasis treatment market.

Some of the medication have severe side effects like retinoid creams, pills, lotions and gels can cause side effects like birth defects. So they should not be recommended to women who are pregnant. Similarly, methotrexate can lead to bone marrow and liver-related diseases. The drugs which are taken to cure it may damage the kidney and raise blood pressure. Also, the high cost

of psoriasis drugs are acting as the restraint for the market.
