Overview:

According to the latest report by IMARC Group, titled “Data Center Rack Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast

2021-2026”, the [global data center rack market](#) exhibited moderate growth during 2015-2020. Looking forward, the global data center rack market is expected to grow at a CAGR of around 8% during 2021-2026. A data center rack refers to a form of a physical frame that is generally made of steel and other alloys. It is used to store cables, cooling systems, electronic servers, networking devices, and other data center computing equipment. Data center racks provide adequate space and airflow to the devices so that they are not damaged by temperature changes and prevent wires and cords from getting tangled. A simple level rack consists of 3-4 mounting rails supported by a framework that keeps the rails secured.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
