Overview:

According to the latest report by IMARC Group, titled “[Organic Dairy Market Outlook](#): Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026”, the global organic dairy market size reached a value of US\$ 20

Billion in 2020. Looking forward, IMARC Group expects the global organic dairy market to exhibit strong growth during 2021-2026. Organic dairy products are generally obtained from livestock that is not treated using antibodies or provided with hormones for their growth and reproduction. Instead, they are raised in an organic environment and are offered food that does not contain any chemical pesticides and fertilizers. The milk obtained by these animals is further utilized for preparing some of the widely consumed dairy products, such as cream, butter, yogurt, cheese, ice cream, and cottage cheese.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

individuals. This is supported by the increasing health-consciousness among the masses that have led to the escalating demand for organic foods. Moreover, several initiatives undertaken by the governments of numerous countries to promote and encourage organic farming practices across the globe are providing a boost to market growth. Other factors, including increasing investments by key players to introduce innovative organic dairy food variants and inflating disposable income levels of the masses, are providing an impetus to the market growth further.
