COVID 19 Impact Analysis:

The global thermoform packaging market report offers information and expansive coverage of the current scenario in the market, including impact and changes resulting from the COVID-19 pandemic and emergence of variants of the virus.

The virus outbreak and social distancing norms and restrictions severely disrupted the overall business landscape and operations worldwide.

Both negative and positive impacts of the COVID-19 pandemic have been analyzed and details provided in the report.

COVID-19 pandemic and lockdowns have resulted in several countries shutting down airports, ports, and commercial and domestic transportation. This had impacted manufacturing activities and operations globally and took a toll on the economy of various countries.

Complete country-wide lockdowns and partial lockdowns had major impact on demand-side and supply-side on the manufacturing sector.

Sudden and drastic downturn in economic activity caused a slowdown in production and also resulted in employment loss to a major extent.

Supply impacts were further compounded due to challenges on the demand-side owing to reduced disposable income, depleting savings, and increased concerns and uncertainties.

The initial impact of the second wave hit small businesses and retailers the hardest owing to

liquidity crunches and stretched working capital.
