As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Market Trends:

The global alfalfa hay market is primarily driven by the growing consciousness regarding animal nutrition, and the escalating demand for high-quality dairy and meat products. Additionally, the

increasing inclination toward commercial feed and hay produced using non-genetically modified organisms (non-GMO) crops has catalyzed the market growth. Furthermore, several leading players are offering long-fiber hay products with improved fiber content, which has augmented the product demand. Other factors, including the rising demand for high-value animal protein and ongoing research and development (R&D) activities in the animal husbandry field, are also anticipated to propel the market growth.
