

# Acne Drugs Market Is Being Benefited By Increasing Healthcare Expenditure

*The Business Research Company's Acne Drugs Market 2021 – Opportunities And Strategies – Global Forecast To 2030*

LONDON, GREATER LONDON, UK,  
November 18, 2021 /

EINPresswire.com/ -- Increasing healthcare expenditure is predicted to upsurge the demand for the acne drugs market. The growth in healthcare expenditure is aiding governments and organizations to spend more on prescription drugs, hospitals, and

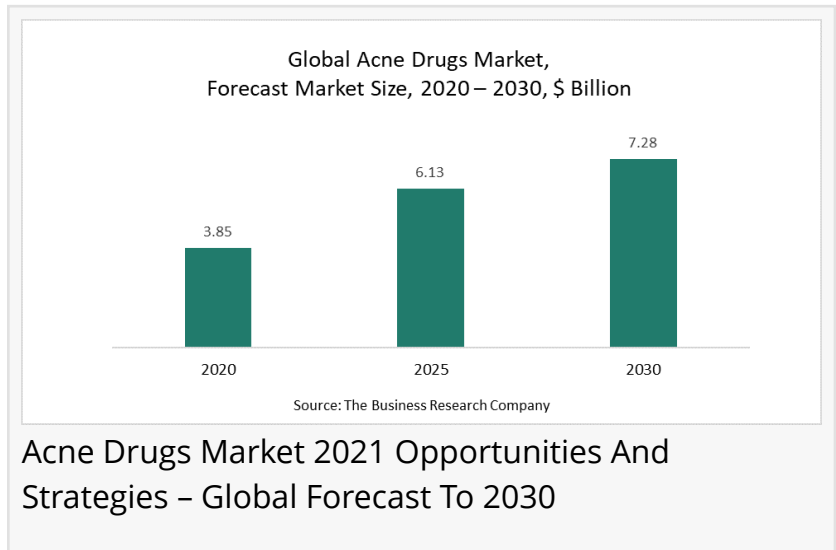

physical & clinical services, thereby driving the acne drugs market. The number of prescription acne treatments as qualified OTC products is also increasing which improves accessibility of acne drugs. According to the National Health Expenditure Projections 2018-2027, in the USA, the national healthcare expenditure is expected to reach nearly \$6.0 trillion by 2027, growing at an average rate of 5.5% annually from 2018 to 2027. Furthermore, prescription drug spending is projected to grow by 6.1% annually during 2020-2027. The rise in healthcare spending contributes to the growth of acne drugs market over the forecast period.
