EINPresswire.com/ -- Shiba Inu (SHIB) has been integrated as [CoinGate's](#) newest cryptocurrency, meaning that every CoinGate user, from merchants to traders or Gift Card shoppers, can now [accept](#), buy, trade, or spend SHIB on the things they want.

Anyone who owns SHIB, will have wider possibilities to spend it and those who want to own this cute meme-coin, will be able to buy it with a 1% rate.

This is a massive business adoption push for Shiba Inu. Here's why:

First, SHIBs integration to the CoinGate services might cheer up the already-hyped Shiba Inu community, because now more than 500 CoinGate merchants can accept Shiba Inu payments from their shoppers.

Secondly, Shiba's integration into our trading system allows you to buy SHIB with 1%

Lastly, with the Shiba Inu token integrated into CoinGate's [gift card store](#), CoinGate becomes one of the few crypto gift card providers, who allows purchasing everyday-life necessities with this altcoin.

What is Shiba Inu?

Shiba Inu (SHIB) is an Ethereum-based altcoin . Fungible tokens like Shiba Inu are ERC-20 tokens,

Every crypto deserve it's change to become a paying currency, therefore integrating Shiba Inu is a fascinating step for our community."

powered by Ethereum, therefore this tokens' ecosystem supports projects, such as the NFT art incubator and the development of a decentralized exchange called Shibaswap.

Shibas' Inu WoofPaper (a.k.a. White paper) starts with a simple question: What would happen if a cryptocurrency project was 100% run by its community? And we can all witness the answer to this question by following SHIB's existence.

Shiba Inu is the second most known meme coin and is usually considered as an alternative to Dogecoin. In fact, it is also known as the "Dogecoin killer".
