We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

The global market is primarily driven by significant growth in the aerospace industry. Along with this, the widespread adoption of helicopter simulators in the defense sector for medical evacuation (MEDEVAC), combat search and rescue (CSAR) and transportation of troops, goods and ammunitions is creating a positive outlook for the market. Additionally, continual technological advancements, such as the integration of artificial intelligence (AI), virtual reality (VR) and the Internet of Things (IoT) solutions with the helicopter simulators, are providing an impetus to the market growth. Other factors, including the increasing government investments in the aviation industry and extensive research and development (R&D) activities conducted by key players, are propelling the market growth further. Looking forward, IMARC Group expects the market to grow at a CAGR of XX% during 2021-2026.
