

Asia Pacific Brain Computer Interface Market | Will Generate Massive Revenue in Future

A BCI system records the brain signals from the surface of the cortex, from devices implanted within the brain or from the sensors placed over the scalp.

PORTLAND, PORTLAND, OR, UNITED STATE, November 19, 2021

/EINPresswire.com/ -- Intensive research carried out to treat fatal brain disorders and injuries and government initiatives such as providing funds to encourage BCI research studies are likely to boost the market growth. However, ethical problems faced during research, i.e., using BCI to treat patients without obtaining informed consent, can act as a restraining factor for the market growth.

In most of the cases, it is not possible to define or restrict the amount of information that can be retrieved from the patient. BCI is comparatively a naive technology, restricted only to laboratory research and many of its applications are yet to be commercialized.
