[Pupil Adaptive®](#), the first and only trifocal presbyopia-correcting (PC-IOL) intraocular lens with patented enhanced Sinusoidal Vision Technology (SVT®). This exciting new product has been introduced in line with the innovative new Golden Ratio in Spectacle Independence concept. The ubiquity and astounding functionality of the Golden Ratio in nature suggest its immense importance from geometry to the human body as one of the most significant and aesthetically pleasing numbers in the Universe. Golden Ratio experience in spectacle independence refers to improving the lives of patients by optimizing vision quality based on their needs. This revolutionary development in cataract surgery will improve the visual performance of many patients”.
