Eswara Prasad, Manager, Materials & Chemicals at Allied Market Research stated, "Increase in the global adoption of textile due to rise in population and the lower cost of recycled textile propel the global recycled textile market growth. Benefits including wastewater saving and energy saving drive the market. However, lack of consumer awareness, lack of equipment, and higher processing costs hinder the market growth. On the contrary, technological developments in recycling process will create many lucrative opportunities in the market."

COVID-19 Scenario:

- The COVID-19 deeply impacted the recycled textiles market across the globe due to international trade bans and lock-downs.
- The market is anticipated to register a recovery as the vaccination is rolled out in many

countries and travel restrictions are getting lifted gradually.

- The suppliers operating in the market were hit hard as the collection of waste/second-hand clothing declined during the COVID-19 pandemic.

The report offers detailed segmentation of the global recycled textile market based on basis of type, end-user industry, and region.
