A menstrual cup is a female sanitary solution usually in the form of small bell-shaped cup that can be inserted into the vagina. These cups are manufactured using medical grade material making it safe for intimate use. As menstrual cups can be reused for 5-10 years, they are more cost effective as compared to tampons and pads and also provides adequate leakage protection. Thus, menstrual cups are one of the most affordable solutions for feminine hygiene protection. These cups can be reusable and disposable depending on the women's requirement. Menstrual cups do not interfere in the normal working of the body. Furthermore, these are easy to use, hygienic, safe, and cost effective.
